About online marketing

When browsing the internet, you may see a banner ad for a Perfect Legal Pleading, LLC product or service. These ads may appear on Yahoo, America Online, or other non-Perfect Legal Pleadings, LLC websites. We use third party ad serving companies to serve our ad banners to sites on which we've paid to advertise. If you click on one of our ads, you go to the Perfect Legal Pleadings, LLC site offering that particular product or service.

Sometimes, these ads may contain small graphics with "tags" in them. These tags tell us how many people respond to our ads. They do not identify you personally. Instead, these tags are used only to measure the effectiveness of our ads placed on non-Perfect Legal Pleadings, LLC sites. The companies that distribute our ads are prohibited by contract from using information other than for the agreed upon purpose to help us market our products and services and to measure response rates.

Perfect Legal Pleadings, LLC also uses read-receipt notifications in our email communications.

We work to ensure privacy and security during your online sessions.

The purchase information you provide to us online is protected by Secure Socket Layer (SSL) technology. SSL is the leading security protocol for data transfer on the internet. This technology scrambles your purchase account information as it moves between your computer's browser and Perfect Legal Pleadings, LLC's computer systems. When information is scrambled, or encrypted in this way, it becomes nearly impossible for anyone other than Perfect Legal Pleadings, LLC to read it. This secure session helps protect the safety and confidentiality of your information when you communicate with us or purchase from us online.

Protecting children's privacy online

From our websites, we do not knowingly collect or use personal information from children under 13 without obtaining verifiable consent from their parents. We are not responsible for the data collection and use practices of nonaffiliated third parties to which our websites may link.
